Java Programming Project Presentation

Introduction

Freelancing has become a popular career option in recent years. Freelancers work independently and manage multiple clients and projects simultaneously. However, managing project details and tracking payments manually can be difficult and error-prone.

This project provides a solution to manage freelancer activities effectively. It allows users to add projects, view details, update payment status, and track pending payments.

TECHNICAL TEAM

Java Programming Project Presentation

Objective

- To develop a system to manage freelancer projects
- To track payments efficiently
- To reduce manual record-keeping
- To improve accuracy and reliability
- To provide easy access to project information

TECHNICAL TEAM

Java Programming Project Presentation

Problem Statement

Freelancers face difficulty in managing multiple projects and tracking payments manually. This leads to errors and inefficiency. Hence, a system is required to manage project details and monitor payment status effectively.

The system should be simple, reliable, and user-friendly so that freelancers can manage their work efficiently without confusion or data loss.

System Requirements

Hardware Requirements:

Processor: Intel i3 or above
RAM: 4GB minimum
Hard Disk: 500GB

Software Requirements:

Operating System: Windows/Linux
Programming Language: Java
IDE: Eclipse/NetBeans

Java Programming
Project Presentation

System Design

Modules:

- Add Project
- View Projects
- Update Payment Status
- View Pending Payments

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

Java Programming
Project Presentation

Module Description

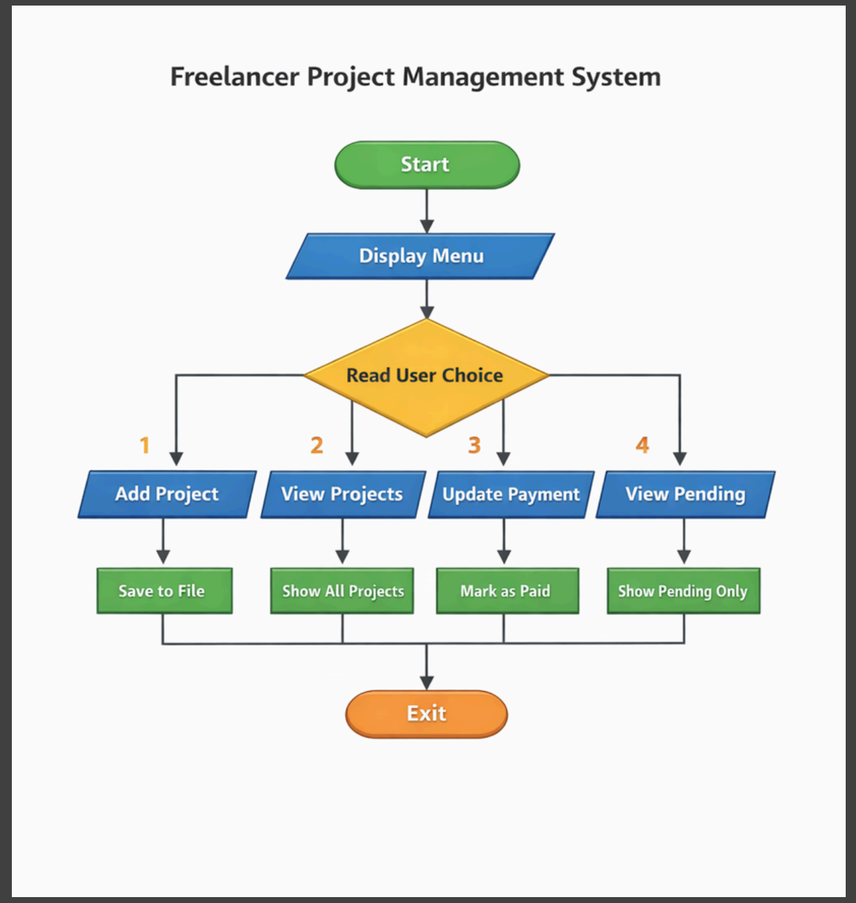
- Accept user input
- Create new project record
- Store data in file
- Read data from file
- Display all project records
- Search project by ID
- Update payment status
- Rewrite updated data into file
- Read all records
- Filter pending payments
- Display unpaid projects
- Close the application

TECHNICAL TEAM

Java Programming Project Presentation

Algorithm / Flowchart

- 1. Start
- 2. Initialize variables
- 3. Input data from the user
- 4. Process data
- 5. Display output
- 6. Stop



TECHNICAL TEAM

Output Screens

```
=== Freelancer Management System ===
1. Add Project
2. View Projects
3. Update Payment Status
4. View Pending Payments
5. Exit
Enter choice: 2

ID: 101
Client: Arun
Project: Website Development
Amount: ₹15000.0
Status: Pending
----------------------------
```

Java Programming Project Presentation

Results & Discussion

The system successfully performs all required operations. It helps freelancers manage projects efficiently and track payments accurately

TECHNICAL TEAM

Java Programming Project Presentation

Conclusion & Future Enhancement

Conclusion

The Freelancer Project Management and Payment Tracking System is a useful tool for freelancers. It simplifies project management and payment tracking. The system can be further enhanced to meet advanced requirements.

Future Enhancements

- GUI implementation
- Database integration (MySQL)
- Mobile application
- Invoice generation
